Intelligent Workplace

Enable your employees to achieve more — anytime, anywhere

Intelligent Workplace provides a complete solution for enhancing productivity, communication, collaboration and mobility without sacrificing security and compliance — whether working across the office or around the globe.

Employees throughout your organization expect flexibility in when, where and how they work. They require greater levels of collaboration and rich data insights to help them make key decisions and drive your business forward.

Traditional environments based on in-person collaboration and fixed devices no longer meet workplace demands, and legacy management tools and processes leave your business vulnerable. To retain top talent and keep your data safe, you need an Intelligent Workplace.

The Cognizant Microsoft Business Group's Intelligent Workplace solution provides your employees with the right tools to achieve their full potential while helping you keep identities, productivity tools, data platforms and devices safe and secure.

"...Employee expectations are changing, and we will need to define productivity much more broadly — inclusive of collaboration, learning, and wellbeing to drive career advancement for every worker."

Satya Nadella, CEO at Microsoft in The Next Great Disruption Is Hybrid Work—Are We Ready?

Microsoft Business Group

Intelligent Workplace Offerings

The Cognizant Microsoft Business Group offers a complete range of Intelligent Workplace services to prepare your business for changing workplace demands. Our Microsoft Cloud experts enable increased productivity, communication, collaboration and mobility while helping you stay safe, secure and compliant — across the office and around the globe. Explore our Intelligent Workplace offerings below to make your workplace vision a reality.

Citizen Developer Enablement & Governance
Empower citizen developers to create platform native applications and automated processes without programming knowledge, utilizing drag-and-drop functionality and modular integrations. We'll help ensure your development projects are secure, appropriately governed and built on a foundation of best practices.

Device as a Service
Reduce overhead and simplify your device management model with a streamlined solution for procuring, deploying, securing, maintaining and retiring hardware — all for a predictable monthly fee per device. You'll retain full control over hardware specifications while improving the end-user experience.

Enabling Collaborative Teams
We act as your trusted workplace partner, ensuring your employees have the right tools, skills and mindset for effective collaboration. Our Microsoft Cloud experts are there every step of the way — from assessment to planning, building, deployment, adoption and management services for the entire Microsoft 365 productivity suite.

Enhanced Productivity with Process Automation
Optimize business processes, eliminate bottlenecks, increase team productivity and improve partner and customer experiences with intelligent automation. Our automation experts help transform your business with platform native technology, including Microsoft Power Platform and AI-based process solutions.

Secure Modern Workplace
Protect your apps, data and more from persistent threats with cloud native, end-to-end solutions for safeguarding your modern workplace. Our Microsoft security experts utilize a Zero Trust security model to protect workplace systems and remote workers no matter when or where they work.

Work Anywhere Securely
Prepare your business for the future of work with our comprehensive toolset designed to fuel collaboration, accelerate productivity gains and deliver an exceptional and secure employee experience to a distributed workforce, utilizing the Microsoft 365 modern workplace platform.

Workplace Analytics
Build an improved and healthier workplace experience with the power of AI and evidence-based methodologies. Gain unparalleled insights for boosting productivity, collaboration and communication across your organization, without sacrificing individual privacy.

Microsoft Business Group

Our Methodology

Build agility and transform your business at speed with our platform native Digital Operating Model that provides enterprise-level blueprints for digital transformation.

Our four key solution areas are Intelligent Enterprise, Intelligent Experience and Operations, Intelligent Cloud, and Intelligent Workplace. They encompass an extensive portfolio of offerings designed to transform your business with focus, simplicity and scale.

Intelligent Enterprise
Envision your organization's ideal digital future. Plot a roadmap to evolve your capabilities in the cloud and stand out in a competitive market.

Intelligent Experience and Operations
Embrace human-centered design, innovative technologies and modern business processes to engineer meaningful experiences for employees, customers and partners.

Intelligent Cloud
Empower your organization with a next-generation cloud operating model to increase velocity and control. Migrate, modernize and deploy with cloud native agility.

Intelligent Workplace
Enable increased productivity, communication, collaboration and mobility while remaining safe, secure and compliant — across the office and around the globe.

Why the Cognizant Microsoft Business Group?

The Cognizant Microsoft Business Group has a singular focus — advancing your cloud modernization journey with focus, simplicity and scale.
